Technical Skills

Languages: Javascript, Typescript, SQL

Technologies: React.js, Next.js, Express.js, Redux Toolkit, Tailwind CSS, Material UI, MySQL, PostgreSQL, Docker, AWS

Experience

Probo Media Technologies Pvt. Ltd.

Gurugram, India

SDE Consultant

February 2025 – August 2025

- Built a web-based system for managing **employee and asset lifecycles** – automating onboarding, offboarding, and tracking to replace spreadsheets, centralize operations, and **boost efficiency by 40%**.
- Fixed performance issues and developed a **multi-level (L1–L3) approval system** for vendor/agreement processing – **automating reviews, improving security, and removing manual checks**.
- Created a DIY assessment tool with Kanban for HR/Admins, supporting candidate evaluations and **personalized manager input** – improving review **efficiency by 50%**.

Software Development Intern

August 2024 – February 2025

- Delivered the frontend for an annual performance review system for **200+** employees within **10 days**, enabling role-based access for **admins, managers, and employees**, streamlining appraisal and feedback collection.
- Integrated **Spotdraft APIs** into the finance tool to **auto-generate contracts** from proposals and vendor data, cutting manual form-filling and approval time by over **60%**.
- Automated office canteen food ordering, **reducing manual order time from minutes/hours to just a few clicks**, significantly speeding up the process.

Marketesq.io

Remote

Software Development Intern

January 2024 – May 2024

- Implemented a production-grade authentication and **route protection** system using Next.js, significantly **improving client-side security**.
- Revamped and enhanced the UI of the Marketesq.io app using modern TailwindCSS and animations, achieving a **pixel-perfect design**.
- Developed a **multipart file upload** system that breaks large files into chunks and uploads them **in parallel to AWS S3** directly from the frontend, **reducing server-side file handling load**.

Projects

Zarasana UI | Next.js, TailwindCSS, motion.dev

- Designed and engineered a modern **UI component library** showcasing strong **design systems thinking and creative frontend craftsmanship**.
- Built **50+ reusable components, blocks, and templates** with seamless **shadcn CLI integration** for direct use in any **React.js** project.
- Implemented three distinct design themes—**Neo-SaaS, Neo-Brutalism, and Glassmorphism**—with full customization and production-ready performance.

BabaChatsAI | Next.js, Gemini, PostgreSQL, Redis

- Built a highly blunt and spiritual **AI chatbot** using **Next.js 15** and **Gemini API** with **streaming responses**.
- Type-safe backend with **Drizzle ORM** and **PostgreSQL**, optimizing for SEO and high-traffic performance.
- Secure, **dual-mode auth** system (**Guest, User**) using **NextAuth.js** with **intelligent rate-limiting**.  [Source Code](#)

Education

Ranchi University

July 2024

Bachelor of Science in Computer Application

Ranchi, Jharkhand

- Relevant Coursework:** Data Structures and Algorithms (Javascript), Operating System, Computer Networks, DBMS(SQL), Java & JDBC
